Subject: Microsoft Settlement

Dear Sir or Madam,

The proposed settlement does not go nearly far enough in stopping microsoft's egregious behavior. The company should be dealt with decisively. How many anti-trust suits do my tax dollars have to fund.

You have a mandate to protect the consumer and competition. Microsoft has repeatedly shown contempt for our government and our people. If we are to fight terrorism around the world we should begin at home. This monopoly only inhibits the growth of our economy, It does not represent it. As a business manager I am forced into disadvantageous purchasing decisions as a direct result of microsoft breaking compliance with technologies before their life cycles are realized. We are forced to spend capital to replace equipment that is not broken just to remain on a platform that they support. You let the best remedy escape when you opposed the break up now you don't even have an enforceable doctrine.

Please for all our sakes take stronger action. I just don't want to continue to buy lesser products because I have no choice.

Thank You
Richard Moore
